No. 1907/2006 (REACH) Printed 20.03.2018 Revision 20.03.2018 (GB) Version 12.0 Methyl bromide (Bromomethane) 2100, 70210

Storage P403

P405

Store in a well-ventilated place. Store locked up.

Hazardous ingredients for labeling bromomethane

! Special rules for supplemental label elements for certain mixtures

The substance may only be used as feedstock.

2.3. Other hazards

Adverse physicochemical effects

Even though the substance has a flammability hazard, it only exhibits such hazard under extreme fire conditions in confined areas.

Adverse human health effects and symptoms

Contact with liquid may cause cold burns/frostbite.

Information pertaining to special dangers for human and environment

Gas/vapour heavier than air. May accumulate in confined spaces, particularly at or below ground level.

Results of PBT and vPvB assessment

not determined

! SECTION 3: Composition/ information on ingredients

3.1. Substances ! Description Content: > 99 %

bromomethane

CAS No 74-83-9 EC No 200-813-2 Index No 602-002-00-2 REACH registration number 01-2119919335-38

3.2. Mixtures

not applicable

SECTION 4: First aid measures

4.1. Description of first aid measures

General information

Remove contaminated soaked clothing immediately. Adhere to personal protective measures when giving first aid. Seek medical advice immediately.

In case of inhalation

Remove the casualty into fresh air and keep him immobile. In the event of pulmonary irritation treat initially with corticoid spray, e.g. Ventolair- or Pulmicort- metered-dose aerosol (Ventolair and Pulmicort are registrated trademarks). Seek medical treatment immediately. In case of respiratory standstill give artifical respiration by respiratory bag (Ambu bag) or respirator. Send for a doctor.

In case of skin contact

In case of contact with skin wash off with soap and water.

In case of frostbite spray with lukewarm (not hot) water for at least 15 minutes. Do not remove clothing frozen to the skin. Thaw it with lukewarm water. Apply a sterile dressing. Obtain medical assistance. Seek medical treatment immediately.

In case of eye contact

Rinse cautiously with water for several minuts. Remove contact lenses, if present and easy to do. Continue rinsing. Call for a doctor immediately.

 20.03.2018 (GB) Version 12.0

 Methyl bromide (Bromomethane)

 2100, 70210

In case of ingestion

Ingestion is not considered a potential route of exposure.

4.2. Most important symptoms and effects, both acute and delayed Physician's information / possible symptoms Redness / blebs on the skin.

The following symptoms may occur in case of strong exposition: Eye defects vomiting Headache Nausea Trembling, clouded awareness, convulsions with delay of several hours Dizziness

Physician's information / possible dangers

Risk of pulmonary oedema In case of massive exposure: Risk of damage to the liver, kidneys and central nervous system.

4.3. Indication of any immediate medical attention and special treatment needed

Treatment (Advice to doctor) Treat symptoms. Continue to monitor for pneumonia and pulmonary oedema. Monitor circulation. Keep under medical supervision for at least 24 hours. Symptoms may not occur until several hours.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media Foam Carbon dioxide Water spray jet

Unsuitable extinguishing media

Full water jet

5.2. Special hazards arising from the substance or mixture

In case of fire formation of dangerous gases possible. In the event of fire the following can be released: Carbon monoxide (CO) Carbonyl bromide Hydrogen bromide (HBr)

5.3. Advice for firefighters

Special protective equipment for fire-fighters Use breathing apparatus with independent air supply (isolated). Wear full protective clothing.

Additional information

Cool endangered containers with water spray jet. Exposure to fire may cause containers to rupture / explode. Fire residues and contaminated firefighting water must be disposed of in accordance with the local regulations. Collect contaminated firefighting water separately, must not be discharged into the drains.

 No. 1907/2006 (REACH)

 Methyl bromide (Bromomethane)

 2100, 70210

! SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel
 See section 8.
 Evacuate area.
 Keep people away and stay on the upwind side.
 Keep away sources of ignition.

! For emergency responders

Remove persons to safety. Personal protection by wearing close-fitting protective clothing and breathing apparatus. Eliminate all ignition sources if safe to do so.

6.2. Environmental precautions

Do not discharge into the drains or bodies of water.. Collect contaminated water / firefighting water separately. If possible, stop flow of product. Eliminate ignition sources. Prevent spread over a wide area (e.g. by containment or oil barriers). If necessary, secure leaky pressure receptacles in a salvage packaging. Suppress gases/vapours/mists with water spray jet Do not discharge into the subsoil/soil.

6.3. Methods and material for containment and cleaning up

Ensure adequate air ventilation.

Clean contaminated objects and floor thoroughly under consideration of environment regulations. Dispose of contaminated material in accordance with regulations.

Additional Information

No water on the leaks.

6.4. Reference to other sections

Safe handling: see section 7 Disposal: see section 13 Personal protection equipment: see section 8

! SECTION 7: Handling and storage

7.1. Precautions for safe handling

! Advice on safe handling

Use only in thoroughly ventilated areas. Transfer and handle only in enclosed systems. Containers' temperature may not be increased above 50 °C. Do not heat with open flames. The working pressure in the receptacle must not exceed the saturation vapour pressure of the pure product resulting at a temperature of 50 °C. Prevent cylinders from falling over. Avoid release to the environment. Ensure valve outlet cap nut or plug is correctly fitted. Ensure valve protection device is correctly fitted. Open valve slowly to avoid pressure shock. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Do not allow backfeed into the container. Suck back of water into the container must be prevented.

No water to valves, flanges and other fittings.

Purging of pipes and valves with inert gases - to avoid: water, solvents.

 Mathyl bromido (Bromomethane)

Methyl bromide (Bromomethane)

2100, 70210

General protective measures

Do not inhale gases/vapours/aerosols.

Hygiene measures

At work do not eat, drink, smoke or take drugs. Wash hands before breaks and after work.

Advice on protection against fire and explosion

Keep away from sources of ignition - No smoking Even though the substance has a flammability hazard, it only exhibits such hazard under extreme fire conditions in confined areas.

Pay attention to general rules of internal fire prevention.

7.2. Conditions for safe storage, including any incompatibilities

! Requirements for storage rooms and vessels

Ventilate store-rooms thoroughly.

Use transportable pressure equipment.

Suitable materials: Normalised carbon steel, tempered alloy steel, austenitic stainless steels.

Valve: Suitable materials: Brass, copper alloys, carbon steels, austenitic stainless steels.

Other material details see ISO 11114.

All regulations and local requirements for the storage of containers have to be respected.

Unsuitable materials: Aluminium alloys.

! Advice on storage compatibility

Do not store with spontaneously flammable materials. Do not store together with combustible liquids or combustible solids. Do not store together with animal feedstuffs. Do not store together with explosives. Do not store together with infectious substances. Do not store together with radioactive material. Do not store together with toxic liquids or toxic solids. Do not store together with food. Do not store together with oxidizing liquids or oxidizing solids. **Further information on storage conditions**

Ensure valve protection device is correctly fitted. Store closed container at cool and aired place. Store only in original container at temperature of 50°C maximum (=122°F). Prevent cylinders from falling over.

Protect from heat/overheating.

7.3. Specific end use(s)

Recommendation(s) for intended use

Use as an intermediate under strictly controlled conditions. Use in accordance with regulation (EC) No 1005/2009 on substances that deplete the ozone layer.

! SECTION 10: Stability and reactivity

10.1. Reactivity

See section "Possibility of hazardous reactions".

10.2. Chemical stability

Stable under recommended conditions of use and storage (see section 7).

10.3. Possibility of hazardous reactions

May react violently with oxidants. Danger of fire and explosion with strong oxidants, alkali metals and earth alkali metals. May react with aluminium. Reactions with metals in powder form.

10.4. Conditions to avoid

Heat sources / heat - risk of bursting. Humidity. Evolution of ignitable vapour-air mixtures possible if stored in large containers and above room temperature.

10.5. Incompatible materials

 Substances to avoid Metals in powder form.
 Zinc.
 Oxidants.
 Alkali metals.
 Earth alkali metals.
 Aluminium / Aluminium alloys.

10.6. Hazardous decomposition products

Carbon monoxide Hydrogen bromide Carbonyl bromide

Thermal decomposition

Remark No decomposition below 400°C.

Ecotoxicological effects	
Value	

	Value	Species	Method	Validation
Fish	LC50 3,9 mg/l (96 h)	rainbow trout	EPA OPP 72-1	
Daphnia	EC50 2,6 mg/l (48 h)	Daphnia magna	EPA OPP 72-2	
Algae	EC50 3,2 mg/l (48 h)	Scenedesmus quadricauda	EU Method C.3	

12.2. Persistence and degradability

Elimination rate	Method of analysis	Method	Validation
------------------	--------------------	--------	------------

Physico-chemical degradability

The product is not stable and hydrolyses.

12.3. Bioaccumulative potential

Does not bioaccumulate.

Because of the n-octanol/water distribution coefficient (log K o/w) accumulation in organisms is not expected.

12.4. Mobility in soil High mobility Adsorption in the soil is not lik

Adsorption in the soil is not likely.

12.5. Results of PBT and vPvB assessment not determined

12.6. Other adverse effects ODP: 0,6

General regulation

Do not allow uncontrolled leakage of product into the environment. Product is not allowed to be discharged into the ground water or aquatic environment. Product is not allowed to be discharged into aquatic environment, drains or sewage treatment plants.

SECTION 13: Disposal considerations

13.1. Waste treatment methods Waste code No. 16 05 04*

Name of waste gases in pressure containers (including halons) containing hazardous substances

Wastes marked with an asterisk are considered to be hazardous waste pursuant to Directive 2008/98/EC on hazardous waste.

Recommendations for the product Dispose of as hazardous waste.

Recommendations for packaging

Transportable pressure equipment (empty, residual pressure): Return to supplier / manufacturer.

 No. 1907/2006 (REACH)

 Printed
 20.03.2018

 Revision
 20.03.2018 (GB) Version 12.0

 Methyl bromide (Bromomethane)

 2100, 70210

! SECTION 14: Transport information

	ADR/RID	IMDG	IATA-DGR
14.1. UN number	1062	1062	1062
14.2. UN proper shipping name	METHYL BROMIDE	METHYL BROMIDE	Methyl bromide
14.3. Transport hazard class(es)	2.3	2.3	2.3
14.4. Packing group	-	-	-
14.5. Environmental hazards	Yes	Yes	Yes

14.6. Special precautions for user

The protective measures listed in Sections 6, 7 and 8 of the Safety Data Sheet have to be considered.

14.7. Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

not applicable

No transport as bulk according IBC - Code.

Land and inland navigation transport ADR/RID

Hazard label(s) 2.3 tunnel restriction code C/D Classification code 2T

Marine transport IMDG

MARINE POLLUTANT Ems: F-C, S-U

Air transport ICAO/IATA-DGR FORBIDDEN

! SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture Application restrictions

Use in accordance with regulation (EC) No 1005/2009 on substances that deplete the ozone layer.

! Other regulations (EU)

Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), Annex XVII No 28 - 30.

Regulation (EU) No. 1005/2009 concerning materials, which cause damage to the ozone layer.

Regulation (EU) No 649/2012 concerning the export and import of dangerous chemicals.

Directive 2012/18/EU on the control of major-accident hazards involving dangerous substances.

VOC standard VOC content

>=99 % 20 °C 1890 hPa

15.2. Chemical Safety Assessment

The protective measures listed in Sections 6, 7 and 8 of the Safety Data Sheet have to be considered. An exposure scenario is not required.

For this substance a chemical safety assessment has not been carried out.

No. 1907/2006 (REACH) Printed 20.03.2018 Revision 20.03.2018 (GB) Version 12.0 Methyl bromide (Bromomethane) 2100, 70210

! SECTION 16: Other information

Recommended uses and restrictions

National and local regulations concerning chemicals shall be observed.

Further information

All declarations of safety-data-sheet refer to pure substance.

The information contained herein is based on the state of our knowledge. It characterizes the product with regard to the appropriate safety precautions. It does not represent a guarantee of the properties of the product.

Indication of changes: "!" = Data changed compared with the previous version. Previous version: 11.4

! Sources of key data used

For the preparation of this safety data sheet, information from our suppliers as well as data from the "database of registered substances" of the European Chemicals Agency (ECHA) were used.
