

Isobutane

Print date 22.02.2023
 Revision date 22.02.2023
 Version 11.0 (en)
 replaces version of 28.07.2021 (10.0)

* **SECTION 1: Identification of the substance/mixture and of the company/undertaking*** **1.1 Product identifier**

Trade name/designation	Isobutane
Art-Nr(n).	2322f, 0066, 70232
Substance name	isobutane
INDEX No.	601-004-00-0
EC No.	200-857-2
REACH No.	01-2119485395-27
CAS No.	75-28-5

* **1.2 Relevant identified uses of the substance or mixture and uses advised against**

- * **Sector of uses [SU]**
 SU3 Industrial uses
 SU4 Manufacture of food products
 SU5 Manufacture of textiles, leather, fur
 SU6b Manufacture of pulp, paper and paper products
 SU7 Printing and reproduction of recorded media
 SU8 Manufacture of bulk, large scale chemicals (including petroleum products)
 SU9 Manufacture of fine chemicals
 SU10 Formulation [mixing] of preparations and/or re-packaging (excluding alloys)
 SU11 Manufacture of rubber products
 SU12 Manufacture of plastics products, including compounding and conversion
 SU13 Manufacture of other non-metallic mineral products, e.g. plasters, cement
 SU19 Building and construction work
 SU21 Consumer uses: Private households (= general public = consumers)
 SU22 Professional uses: Public domain (administration, education, entertainment, services, craftsmen)
 SU24 Scientific research and development

Process categories [PROC]

- PROC1 Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions.
 PROC2 Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions
 PROC3 Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition
 PROC4 Chemical production where opportunity for exposure arises
 PROC5 Mixing or blending in batch processes
 PROC6 Calendering operations
 PROC7 Industrial spraying
 PROC8a Transfer of substance or mixture (charging and discharging) at non- dedicated facilities
 PROC8b Transfer of substance or mixture (charging and discharging) at dedicated facilities
 PROC9 Transfer of substance or mixture into small containers (dedicated filling line, including weighing)
 PROC10 Roller application or brushing
 PROC11 Non industrial spraying
 PROC12 Use of blowing agents in manufacture of foam
 PROC13 Treatment of articles by dipping and pouring
 PROC14 Tableting, compression, extrusion, pelletisation, granulation
 PROC15 Use as laboratory reagent
 PROC16 Use of fuels
 PROC17 Lubrication at high energy conditions in metal working operations
 PROC18 General greasing /lubrication at high kinetic energy conditions
 PROC20 Use of functional fluids in small devices
 PROC21 Low energy manipulation and handling of substances bound in/on materials or articles
 PROC24 High (mechanical) energy work-up of substances bound in /on materials and/or articles

Environmental release categories [ERC]

- ERC1 Manufacture of the substance
- ERC2 Formulation into mixture
- ERC3 Formulation into solid matrix
- ERC4 Use of non-reactive processing aid at industrial site (no inclusion into or onto article)
- ERC5 Use at industrial site leading to inclusion into/onto article
- ERC6a Use of intermediate
- ERC6c Use of monomer in polymerisation processes at industrial site (inclusion or not into/onto article)
- ERC6d Use of reactive process regulators in polymerisation processes at industrial site (inclusion or not into/onto article)
- ERC7 Use of functional fluid at industrial site
- ERC8a Widespread use of non-reactive processing aid (no inclusion into or onto article, indoor)
- ERC8c Widespread use leading to inclusion into/onto article (indoor)
- ERC8d Widespread use of non-reactive processing aid (no inclusion into or onto article, outdoor)
- ERC8e Widespread use of reactive processing aid (no inclusion into or onto article, outdoor)
- ERC8f Widespread use leading to inclusion into/onto article (outdoor)
- ERC9a Widespread use of functional fluid (indoor)
- ERC9b Widespread use of functional fluid (outdoor)
- ERC10a Widespread use of articles with low release (outdoor)
- ERC11a Widespread use of articles with low release (indoor)

*

Product Categories [PC]

- PC1 Adhesives, sealants
- PC3 Air care products
- PC4 Anti-Freeze and de-icing products
- PC8 Biocidal products
- PC9a Coatings and paints, thinners, paint removers
- PC9b Fillers, putties, plasters, modelling clay
- PC9c Finger paints
- PC12 Fertilizers
- PC13 Fuels
- PC15 Non-metal-surface treatment products
- PC18 Ink and toners
- PC21 Laboratory chemicals
- PC23 Leather treatment products
- PC24 Lubricants, greases, release products
- PC25 Metal working fluids
- PC26 Paper and board treatment products
- PC27 Plant protection products
- PC28 Perfumes, fragrances
- PC29 Pharmaceuticals
- PC31 Polishes and wax blends
- PC32 Polymer preparations and compounds
- PC34 Textile dyes, and impregnating products
- PC35 Washing and cleaning products
- PC36 Water softeners
- PC37 Water treatment chemicals
- PC38 Welding and soldering products, flux products
- PC39 Cosmetics, personal care products

1.3 Details of the supplier of the safety data sheet

Supplier

GHC Gerling, Holz & Co. Handels GmbH
Ruhrstraße 113
D-22761 Hamburg

* **SECTION 2: Hazards identification*** **2.1 Classification of the substance or mixture**

Classification according to Regulation (EC) No 1272/2008 [CLP]	Classification procedure
--	--------------------------

Flam. Gas 1A, H220

Press. Gas (Liq.), H280

Hazard statements for physical hazards

H220 Extremely flammable gas.

H280 Contains gas under pressure; may explode if heated.

* **2.2 Label elements*** **Labelling according to Regulation (EC) No. 1272/2008 [CLP]****Hazard pictograms**

GHS02

Signal word

Danger

Hazard statements

H220 Extremely flammable gas.

H280 Contains gas under pressure; may explode if heated.

Precautionary statements

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P377 Leaking gas fire: Do not extinguish, unless leak can be stopped safely.

P381 In case of leakage, eliminate all ignition sources.

P403 Store in a well-ventilated place.

* **Supplemental hazard information**

EIGA0357 Asphyxiant in high concentrations.

Please return container with residual pressure.

* **2.3 Other hazards*** **Adverse human health effects and symptoms**

Gas/vapour heavier than air. May accumulate in confined spaces, particularly at or below ground level.

The inhalation of gas / vapour in high concentrations may cause cardiac arrhythmia.

Contact with liquid may cause cold burns/frostbite.

* **Other adverse effects**

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

* **Results of PBT and vPvB assessment**

This substance does not meet the PBT/vPvB criteria of REACH, Annex XIII.

SECTION 3: Composition / information on ingredients**3.1 Substances**

Substance name	isobutane
INDEX No.	601-004-00-0
EC No.	200-857-2
REACH No.	01-2119485395-27

Additional information

Content: > 95 %

3.2 Mixtures

not applicable

*** SECTION 4: First aid measures**

*** 4.1 Description of first aid measures**

General information

Remove contaminated, saturated clothing immediately.
Call a physician immediately.
First aider: Pay attention to self-protection!

Following inhalation

Remove casualty to fresh air and keep warm and at rest.
In case of respiratory standstill give artificial respiration by respiratory bag (Ambu bag) or respirator. Obtain medical assistance.

*** Following skin contact**

In case of skin contact rinse with warm water.
In case of frostbite, wash with plenty of water; do not remove clothing.
In case of frostbite rinse with lukewarm (not hot) water for at least 15 minutes. Do not remove clothing frozen to the skin.
Thaw with lukewarm water. Apply a sterile dressing. Obtain medical assistance.

After eye contact

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Obtain medical assistance.

Following ingestion

Ingestion is not considered a potential route of exposure.

*** 4.2 Most important symptoms and effects, both acute and delayed**

Symptoms

The following symptoms may occur in case of strong exposition:
Unconsciousness
Cardiac arrhythmias
Dyspnoea
Headache
Nausea

*** 4.3 Indication of any immediate medical attention and special treatment needed**

*** Notes for the doctor**

Treat symptomatically.
Do not apply drugs of the adrenaline ephedrine group.

*** SECTION 5: Firefighting measures**

*** 5.1 Extinguishing media**

*** Suitable extinguishing media**

Extinguishing powder
Water spray jet

Unsuitable extinguishing media

Carbon dioxide (CO₂)
Full water jet

*** 5.2 Special hazards arising from the substance or mixture**

*** Hazardous combustion products**

In case of fire formation of dangerous gases possible.
Carbon monoxide
Carbon dioxide (CO₂)

Isobutane

Print date 22.02.2023
Revision date 22.02.2023
Version 11.0 (en)
replaces version of 28.07.2021 (10.0)

* **5.3 Advice for firefighters**

* **Special protective equipment for firefighters**
Wear a self-contained breathing apparatus and chemical protective clothing.

* **Additional information**

If possible, shut off gas valves and move containers to a safe location.
Use water spray jet to protect personnel and to cool endangered containers.
Exposure to fire may cause rupture / explosion of the containers.
Do not extinguish a leaking gas flame unless absolutely necessary. Spontaneous/explosive re-ignition may occur. Extinguish any other fire.
Fire residues and contaminated firefighting water must be disposed of in accordance with the local regulations.

* **SECTION 6: Accidental release measures**

* **6.1 Personal precautions, protective equipment and emergency procedures**

* **For non-emergency personnel**
Use personal protection equipment.
Leave the danger area.
Keep people away and stay on the upwind side.

* **For emergency responders**
Personal protection by wearing close-fitting protective clothing and breathing apparatus.
Pay attention to extension of gas especially at ground (heavier than air) and in direction of the wind.
Eliminate all ignition sources if safe to do so.
Remove persons to safety.

* **6.2 Environmental precautions**

If possible, stop flow of product.
Do not allow to enter into soil/subsoil.
Do not allow to enter into surface water or drains.

* **6.3 Methods and material for containment and cleaning up**

* **For containment**
If necessary, secure leaky pressure receptacles using a salvage container.
Prevent the liquid from spreading over a wide area (set up barriers, cover sewage systems).
Limit expansion of the gas (water spray jet).

* **For cleaning up**
Leave to vapourize.
Provide adequate ventilation.

6.4 Reference to other sections

Disposal: see section 13
Personal protection equipment: see section 8

* **SECTION 7: Handling and storage**

* **7.1 Precautions for safe handling**

* **Protective measures**
Use only in well-ventilated areas.
Transfer and handle product only in closed systems.
Usual measures for fire prevention.
Containers' temperature should not be increased above 50 °C.
The working pressure in the receptacle must not exceed the saturation vapour pressure of the pure product resulting at a temperature of 50 °C.
Prevent cylinders from falling over.
Take precautionary measures against static discharges. Ground barrels and installations. Use only antistatically equipped (spark-free) tools.
Use explosion-proof machinery, apparatus, ventilation facilities, tools etc.
Ensure valve protection device is correctly fitted.
Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
Open valve slowly to avoid pressure shock.
Do not allow backflow into the container.
Entering of water into the container must be prevented.
No water to valves, flanges and other fittings.
Purging of pipes and valves with inert gases - to avoid: water, solvents.

Isobutane

Print date 22.02.2023
 Revision date 22.02.2023
 Version 11.0 (en)
 replaces version of 28.07.2021 (10.0)

Advices on general occupational hygiene

When using do not eat, drink, smoke, sniff.
 Wash hands before breaks and after work.
 Remove contaminated clothing and protective equipment before entering eating areas.

*** 7.2 Conditions for safe storage, including any incompatibilities***** Requirements for storage rooms and vessels**

All regulations and local requirements for the storage of containers have to be respected.
 Keep container tightly closed and in a well-ventilated place.
 Containers' temperature should not be increased above 50 °C.
 Prevent cylinders from falling over.
 Only use containers specifically approved for the substance/product.
 Information on suitable materials for receptacles and valves see ISO 11114.

Storage class

2A Gases (except aerosol dispensers and lighters)

*** Materials to avoid**

Do not store together with explosives.
 Do not store together with flammable liquids.
 Do not store together with flammable solids.
 Do not store together with pyrophoric and self-heating substances.
 Do not store together with oxidizing liquids or oxidizing solids.
 Do not store together with toxic liquids or toxic solids.
 Do not store together with infectious substances.
 Do not store together with radioactive material.
 Do not store together with food or feed.

7.3 Specific end use(s)**Recommendation**

Exposure scenarios (ES) see annex to this safety data sheet.

*** SECTION 8: Exposure controls/personal protection***** 8.1 Control parameters***** Occupational exposure limit values**

CAS No.	EC No.	Substance name	occupational exposure limit value
75-28-5	200-857-2	iso-Butane	Short-term(ml/m ³) 1000 (1) (1) 15 minutes average value (IE)

*** 8.2 Exposure controls****Appropriate engineering controls****Technical measures to prevent exposure**

Transfer and handle only in enclosed systems.

*** Personal protection equipment****Eye/face protection**

Protective goggles according to EN 166, in case of increased risk add protective face shield.

*** Hand protection**

Safety gloves according to EN 388:
 Chromate-free leather

*** Body protection:**

Safety shoes with steel toecap.
 Body covering work clothing or chemical resistant suit at increased risk.

Isobutane

- * **Respiratory protection**
 Keep self contained breathing apparatus readily available for emergency use.
 Respiratory protection necessary at:
 high concentrations
 Respiratory protection complying with EN 137.
 Short term: filter apparatus, filter AX
 In case of rescue and maintenance activities in storage containers use environment-independent breathing apparatus because of risk of suffocation due to displacement of oxygen.
- * **Thermal hazards**
 Use cold-resistant protective equipment.
- * **Environmental exposure controls**
- * **Remark**
 Prevent release to the environment.

* **SECTION 9: Physical and chemical properties*** **9.1 Information on basic physical and chemical properties****Physical state**

Gaseous / liquefied under pressure.

Colour

colourless

Odourlike:
Gasoline**Safety relevant basis data**

	Value	Method	Source, Remark
Odour threshold:			not determined
Melting point/freezing point	Melting point -159.42 °C		
Boiling point or initial boiling point and boiling range	-11.7 °C		
flammability			flammable
Lower and upper explosion limit	Upper explosion limit 9.4 Vol-%		
Lower and upper explosion limit	Lower explosion limit 1.5 Vol-%		
Flash point			not applicable
Auto-ignition temperature	460 °C		
Decomposition temperature			No decomposition if used as directed.
pH			not applicable

Short description of exposure scenarios

0. Background

Isobutane is classified as hazardous to safety. In particular, the following classification has been established in accordance with CLP Regulation:

- Flam. Gas 1 H220 (Extremely flammable gas)
- Gases under pressure H280 (Contains gas under pressure; may explode if heated)

According to Article 14 of REACH Regulation, the risk assessment and the generation of exposure scenario were performed for flammability; by contrast, the hazard class “gas under pressure” does not require neither the risk assessment nor the generation of scenarios.

1. Uses

1.1. Identified uses

The overall identified uses of the substance are listed in the following Table:

Isobutane

1.2. Uses advised against

Other uses are not recommended unless an assessment is completed, prior to commencement of that use, which demonstrates that the risk will be controlled.

2. Exposure assessment

In the Chemical Safety Assessment (CSA) carried out according to Article 4(3) of REACH Regulation and referring to Annex I section 1-3 (human health hazard, physico-chemical hazard assessment and environmental hazard assessment) and section 4 (PBT/vPvB assessment) of the Regulation it was not detected any hazard.

The substance, as well as the other members of the same category, is not classified for human health or the environment, is not a CMR and is not PBT or vPvB. Therefore, a quantitative human and environmental exposure assessment was not performed. A qualitative approach was used in order to define the operational conditions that ensure the control of risks related to physical hazards (flammability).

3. Risk characterization

The substance, as well as the other members of the same category, is not classified for human health or the environment, is not a CMR and is not PBT or vPvB. Therefore, the calculation of characterization ratios (RCR) was not performed. A qualitative approach was used in order to define the operational conditions that ensure the control of risks related to physical hazards (flammability), as described below.

The accident scenarios relevant for REACH are minor accidents which might occur in the workplace and those related to consumer use. Major accidents caused by chemicals and their components to manage these risks are regulated under the Seveso II Directive and do not need to be considered.

Risks from the physicochemical hazards of substances can be controlled by implementing risk management measures tailored to each specific risk. These measures need to be implemented to control the risks and to show that safe use can be accomplished; moreover, safety data sheets should be made available in which appropriate risk management measures are identified and communicated.

For flammable substances the organizational and technical measures listed in Table 1 should be taken to avoid ignition of flammable substances. These measures are suitable to prevent accidents which might occur at the workplace or during consumer use. Larger facilities manufacturing or using substances with flammable properties in significant quantities should follow the ATEX Directive (94/9/EC and 99/92/EC) to control risks arising from flammable substances and explosive atmospheres.

Based on the implementation of a selection of handling and storage risk management measures for the identified uses, it is possible to conclude that there is no immediate concern as the risk is controlled to an acceptable level.

4. Guidance how the DU can evaluate whether he operates within the conditions set in the exposure scenarios

4.1. Workers

The risk assessment for the flammability was performed in a qualitative way. As a result, some operative conditions (OC) and risk management measures (RMM) are required to control the identified risks.

Since these OCs and RMMs are applicable also on a small scale (i.e. by industries, professional users), it is recommended to operate according to them and to avoid significant deviations which could downgrade the safety.
